25 bridge conventions you should know

Published: September 3, 2026 | Index ID: #-

Introduction

Bridge is a game of subtle signals, where a single bid can carry a wealth of information about a player's hand. Mastering the most common bridge conventions unlocks a world of strategic possibilities, allowing you to communicate with your partner efficiently and confidently. Whether you're a beginner looking to build a solid foundation or an intermediate player aiming to refine your bidding, knowing the essential conventions will elevate your play and improve your results at the table. In this article, we'll explore 25 bridge conventions that every serious player should understand, with clear explanations and practical examples to help you integrate them into your game.

Understanding Bridge Conventions

Bridge conventions are agreed-upon meanings for specific bids or doubles that go beyond natural bidding. They help bridge players convey hand shape, strength, and distribution in a concise manner. By learning and applying these signals, you reduce the risk of miscommunication, avoid costly errors, and increase the likelihood of reaching the optimal contract. Conventions are usually taught in pairs or small groups, and they are often tailored to suit a partnership's style and preferences. The key to success is consistency: both partners must agree on the meaning of each convention and practice it regularly.

25 Bridge Conventions You Should Know

1. Stayman

Stayman is a classic convention that follows a 1NT opening. By bidding 2&c, the responder asks the opener whether they hold a four card major. If the opener has a 4 card major, they respond with 2&f or 2&e to show clubs or hearts, respectively. If the opener has no suitable major, they bid 2&`. Stayman helps the partnership find a major suit fit and potentially play in a game contract.

2. Jacoby Transfer

Jacoby Transfer is used after a 1NT opening to find a major suit fit. The responder bids the next higher rank of the desired major (e.g., 2&f to transfer to hearts, 2&e to transfer to spades). The opener then bids the major, showing a four card fit. This convention keeps the bidding in the major, allowing for a stronger final contract and preserving the natural 2&` and 2&c bids for other purposes.

3. 2/1 Game Force

After a 1NT opening, the responder bids 2&` (or 2&e) to show a game level hand with a five card major. The opener is forced to bid 2NT or higher, ensuring the partnership reaches game level if both have sufficient strength. This convention is particularly useful when the responder has a long, strong major but does not want to commit to a major bid that could be interpreted as a transfer.

4. 2/2 Game Force

Following a 1NT opening, the responder bids 2&c to indicate a game level hand with a five card club suit. The opener must bid 2NT or higher, which helps the partnership find a suitable contract. 2/2

Game Force is valuable when the responder has a strong hand but prefers to keep the bidding in a minor rather than a major, allowing for a potential minor suit contract.

5. Negative Double

A negative double is made after a 1NT opening when the opponent has bid a suit. The double shows a weak hand with at least one stopper in the opponent's suit. It also indicates a willingness to play in a no trump contract if the partnership has enough combined points. This convention prevents the opponents from gaining a free contract and encourages a more accurate assessment of the hand's strength.

6. Positive Double

A positive double is used after a 1NT opening when the opponent has bid a suit and the responder holds a strong hand with a good fit in that suit. The double invites the partner to play in a contract that may benefit from the partnership's combined strength. Unlike the negative double, a positive double signals a strong hand and a desire to explore higher contracts.

7. 2NT (Slam Inquiry)

The 2NT bid after a 1NT opening is a standard slam inquiry. It asks the partner whether they hold any 4 card or longer suits that could help reach a slam. The responder replies with natural bids or a negative double if they have no such suits. This convention streamlines slam exploration and reduces the risk of overbidding.

8. 2&c (Slam Inquiry)

After a 1NT opening, the 2&c bid is a common slam inquiry that signals a willingness to explore a slam. The opener can respond with a natural 2&f, 2&e, or 2&` to show a 4 card or longer suit. A negative double indicates no such suits. This convention is widely used because it keeps the bidding natural while still gathering essential information.

9. 2&f (Slam Inquiry)

In some partnerships, 2&f after a 1NT opening is reserved for a slam inquiry. The opener can bid 2&` or 2NT to show a 4 card or longer suit. If the opener has no suitable suit, they bid 2&c or double.
