History of American Survival Guide Magazine

Early Years

Founded in 1998, the magazine began as a modest quarterly aimed at the small but growing community of survivalists and outdoor enthusiasts. Evolution Over Time

By the early 2000s, the readership had expanded dramatically, prompting the publication to shift to a monthly schedule. This change allowed for more timely coverage of emerging topics such as cyber security for off grid living, sustainable food sourcing, and the rise of "prepper" culture. The magazine's editorial board also broadened to include experts from various fields, including botanists, engineers, and veteran survival instructors.
