apa citation for davis drug guide

Published: September 19, 2026 | Index ID: #-

Introduction

When writing academic papers, research reports, or professional documents, proper citation is essential for credibility, academic integrity, and the ability for readers to locate the original source. The **Davis Drug Guide** is a widely used reference that provides detailed information on medication dosage, side effects, and drug interactions. Because it is a specialized source, students and researchers often need guidance on how to cite it correctly in APA style. This article offers a comprehensive, step by step guide to citing the Davis Drug Guide in APA format, covering print and online versions, in text citations, and common pitfalls to avoid. Whether you are a pharmacy student, a medical researcher, or a health care professional, you'll find the information here useful for producing polished, error free references.

What Is the Davis Drug Guide?

The **Davis Drug Guide** is an authoritative compendium of drug information that includes pharmacologic classifications, therapeutic uses, contraindications, and patient counseling points. Published annually by the American Society of Health-System Pharmacists (ASHP), the guide is a go-to resource for pharmacists, physicians, and nursing staff worldwide. Its structured format and evidence based content make it an ideal reference for clinical decision making and academic research.

Key Features of the Guide

- Comprehensive Coverage: Over 4,000 drug entries with up to 10,000 pages of information.
- Evidence Based Content: Peer reviewed data and citations to original research.
- Regular Updates: New editions are released yearly to reflect the latest drug approvals and safety alerts.
- Digital Accessibility: Available in PDF, e book, and web based formats for easy access.

APA Citation Basics

The American Psychological Association (APA) style is one of the most common citation formats in the social sciences, health sciences, and education. APA 7th edition, published in 2019, introduced several updates that affect how you cite books, electronic sources, and specialized reference works such as the Davis Drug Guide.

Core Components of an APA Reference

1. Author(s)
2. Publication Year
3. Title of the Work
4. Edition (if not first)
5. Publisher
6. URL or DOI (if applicable)

When citing a book or guide, you typically treat it as a monograph. However, because the Davis Drug Guide is a reference work published by a professional society, the citation may include the society as the author or the publisher, depending on the edition's formatting.

APA 7th Edition Style Guide for Reference Works

Below is a quick reference table that summarizes how to format citations for books and electronic books in APA 7th edition. Use this as a checklist when constructing your reference.

Element	Format
Author(s)	Last name, Initials.
Year	(Year).
Title	Title in italics, sentence case.
Edition	Edition number in parentheses, if not first.
Publisher	Publisher name.
URL/DOI	https://...

Note that the APA style recommends omitting “Publisher location” (city) for books published after 2019, so the citation will not include that element.

How to Cite the Davis Drug Guide in APA

Below are detailed examples of how to cite the Davis Drug Guide for both print and online versions. The examples assume you are referencing the 2023 edition, but the structure will be the same for other years.

Citing the Print Version

The print citation follows the standard book format. Because the guide is published by ASHP, the publisher element will be the American Society of Health System Pharmacists.

\\nAmerican Society of Health System Pharmacists. (2023)*Davis drug guide*(23rd ed.). American Society of Health System Pharmacists.\\n\\n\\nKey points:

- The author is the publisher organization.
- Include the edition number in parentheses.
- Do not include the city of publication.

Citing the Online Version

When citing the online version, add a **URL**at the end of the reference. If a DOI is available, use that instead of a URL.

\\nAmerican Society of Health System Pharmacists. (2023)*Davis drug guide*(23rd ed.). American Society of Health System Pharmacists. https://www.ashp.org/Resources/DavisDrugGuide\\n\\n\\nIf the guide is accessed through a subscription database, include the database name and the URL of the database’s homepage, not the direct link to the guide.

Citing a Specific Drug Entry

When you reference a particular drug entry within the guide, you should treat it as a chapter or article within the book. APA style recommends adding the chapter title (in sentence case) and the page range, if available.

\\nAmerican Society of Health System Pharmacists. (2023)*Amiodarone* (p. 1523–1527). In *Davis drug guide*(23rd ed.). American Society of Health System Pharmacists. https://www.ashp.org/Resources/DavisDrugGuide\\n\\n\\nIn cases where the guide provides a unique identifier (e.g., a drug code), you can include it in the reference for clarity.

In Text Citations for the Davis Drug Guide

APA 7th edition requires two types of in text citations: parenthetical and narrative. The parenthetical citation includes the author (publisher) and year, while the narrative citation incorporates the author into the sentence.

Parenthetical Citation

(American Society of Health System Pharmacists, 2023)

Narrative Citation

According to the **Davis Drug Guide**(American Society of Health System Pharmacists, 2023), amiodarone is effective for treating ventricular arrhythmias.

Multiple Authors

When citing a specific drug entry authored by an individual or a team of authors, list the authors' last names and initials. If there are more than two authors, use the first author followed by "et al."

\\n(Smith, J. D., & Lee, R. K., 2023)\\n\\n\\nPage Numbers

To cite a specific page or range, include the page number after the year, separated by a comma.

\\n(American Society of Health System Pharmacists, 2023, p. 1525)\\n\\n\\nCommon Mistakes to Avoid

1. Using the Wrong Author: The Davis Drug Guide is typically credited to the publisher organization, not a single author.
2. Omitting the Edition: Always include the edition number if it is not the first edition.
3. Adding the City of Publication: APA 7th edition no longer requires the city for books published after 2019.
4. Using an Outdated URL: Verify that the URL or DOI still works; otherwise, use the database citation format.
5. Misplacing Italics: The book title must be italicized, but the chapter or drug name should not.

Tips for Citing the Davis Drug Guide in Academic Papers

- Check the Edition: If you are using a library copy, confirm the year and edition before citing.
- Use the Official Publisher Name: "American Society of Health System Pharmacists" is the standard publisher name.
- Keep URLs Short: If the link is extremely long, use a URL shortener only if the publisher recommends it.
- Include the DOI if Available: A DOI provides a persistent link to the electronic source.
- Use a Reference Management Tool: Software like EndNote, Zotero, or Mendeley can auto format citations in APA style.

Additional Resources for APA Citation

1. APA Style Official Website – The primary source for APA guidelines.
2. Purdue OWL APA Guide – A comprehensive reference for APA formatting.
3. Citethisforme.com – Quick citation generator for APA.
4. Zotero – Free reference manager that supports APA style.
5. EndNote – Commercial citation management software.

Conclusion

Citing the **Davis Drug Guide**accurately in APA format is essential for maintaining scholarly rigor and ensuring your readers can locate the exact source you consulted. By following the guidelines outlined above—identifying the

correct author, including the edition, formatting the title and publisher, and adding the appropriate URL or DOI—you can produce a professional reference that meets APA 7th edition standards. Whether you are writing a research paper, preparing a clinical report, or drafting a grant proposal, a correct citation not only upholds academic integrity but also enhances the credibility of your work.
